

I listen to Air1 Radio because I have not found another station that provides the style of Contemporary Christian Music that I like. This station is heard throughout the nation because of the translators they are able to operate. If the change to give more priority to LPFM stations passes, I am very concerned that stations like Air1 that depend on the national market to stay in business would be forced off the air.

I also listen to another local Christian station that uses multiple translators WBFJ out of Winston-Salem. This proposal would also force them out of business leaving no Contemporary Christian radio stations. There is a need for this music to provide a positive influence in the world.

Please encourage the use of translators by not increasing the priority of LPFM stations. Thank you for your consideration.
